

Common Misdiagnosis Breakdown

When Diagnoses Overlap & Miss the Developmental Picture

Why Diagnoses Overlap

Labels often overlap,
Similar behaviors for different reasons.

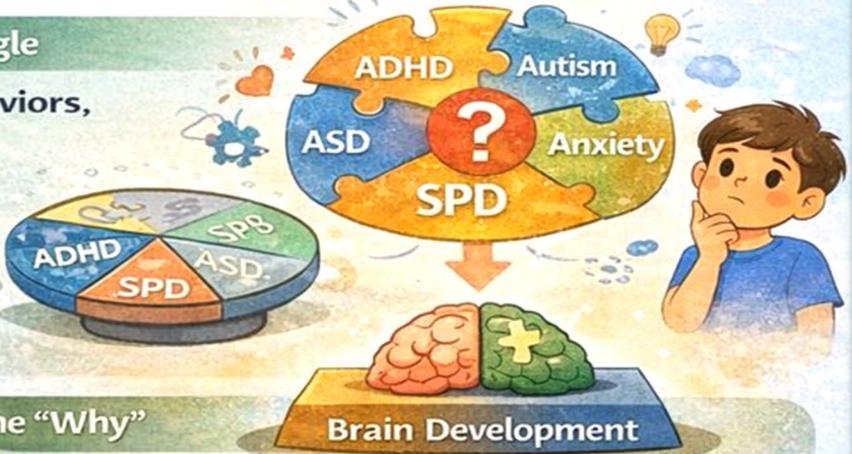

- Restlessness
- Emotional overwhelm
- School struggles
- Sensory reactivity

Labels Name the Struggle

Diagnoses describe behaviors,
not their causes:

- Restlessness
- Emotional overwhelm
- School struggles
- Sensory reactivity

Development Explains the “Why”

Hemispheric Imbalance

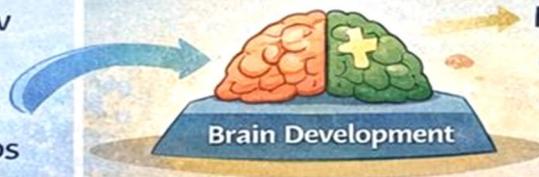

- Retained Primitive Reflexes
- Sensory Processing Delays

- Hemisphere Imbalance
- Retained Primitive Reflexes
- Incomplete Motor Development

Is Like:

- Looking below the diagnosis
- Identifies underlying gaps

Seeing the Developmental Picture

More complete answers

- Targeted support
- Foundational change

Instead of just asking

“Which diagnosis is it?”

A developmental lens asks:

What’s happening in my child’s brain—and why?
